The Fashion Parade of the Garden

1933

1946

ALL the "All America Selections" introduced since 1933 are grouped here. They represent the newest developments in flowers, the latest fashions. In making these your choice, you are assured of having selected the best for your garden.

HERE IS HOW THE "ALL AMERICA SELECTIONS" ARE MADE

"ALL AMERICA SELECTIONS" are the choice of the Nation's leading horticultural judges, as being the most worthy new varieties introduced each year. They include species from around the World, imported and planted in twelve different localities in the United States, from whence they are judged. Their recommendations are authentic and dependable; your safeguard against ambiguous creations or claims. Novelties within our garden walls intrigue us, for they tax our keenest anxiety in expectation of unrevealed new beauties—and we pride ourselves of keeping in with the modern touch.

Beautiful Lawns by Burnett Seedsmen

Formula No. 1 Lawn Grass Seed Mixture

It requires no more effort to sow the best grass seed mixture than it does a poorer grade, and it is less expensive when you consider its permanence which eliminates constant resowing. Formula No. 1, the **balanced mixture**, is composed of several of the choicest, re-cleaned dwarf and spreading grasses, each serving its specific purpose; the **quick growing** biennials which act as nurse crops to the **slower germinating** more permanent sorts which reach maximum maturity only after 2 or 3 years; the **spreading varieties** which fill in bare spots left vacant by the disappearing (after a few seasons) biennial grasses, and the natural **drought resistant** varieties. Formula No. 1 will produce a fine, deep velvety green, close turf which will lend a tone of intimacy to the palatial mansion or the humblest dwelling. It completes the landscape. Lb. 80c; 5 lbs. \$3.75; 10 lbs. \$7.25; 25 lbs. \$17.50; 100 lbs. \$67.00.

Sandy and Dry Formula. Heat and drought resistant.	} 25 lbs. \$12.00 100 lbs. \$45.00
Heavy Clay Formula. Wet or acid soils.	
Medium Loamy Formula. Well drained loamy soil.	

We advise sowing 10 lbs. Mixed Clover along with Pasture Grass Seed in the Spring.

DOES YOUR SOIL BAKE? IS IT POROUS?

SANI-SOIL

CORRECTS THAT CONDITION when mixed with the soil or spread over the surface. Made from California Redwood bark, though non-absorbent, it permits water to filter through the soil and at the same time forms a perfect insulation against excessive heat which steals the moisture and bakes the soil. Exceptionally fine for lawns, especially during the drought months. Use it everywhere in the garden for vegetables, flowers and shrubs. It permits the roots to breathe and plant foods to function at their best. Send for circular. 25 lbs. bag \$2.00; 100 lbs. \$6.00; 1,000 lbs. \$57.50. Customer pays transportation.

when dusted on seeds whether sown in fields or in flats. It is a non-poisonous, non-metallic dust which adheres readily to the seed forming a protective and disinfectant coating against harmful fungi causing damping-off and other organisms of disease which might get on the seed, resulting in better stands and greater yields. It has an advantage in that the seed may be treated at any time; it does not deteriorate with age and will not spoil the inoculation of legumes. Recommended for all garden seeds except beet. Try it especially on Lima Beans.

Asters a (Wilt Resistant)

Need no introduction, but what is **Wilt Resistant Aster Seed**? It's a strain of seed produced from plants that were grown in heavily wilt-infested soil. It is reasonable to infer that if a strain was able to grow to full maturity and bear seed, it's genera or offspring must likewise be immune to wilt. Don't take chances, sow **Wilt Resistant Strain Asters** wherever possible.

Asters prefer rich sandy or loamy soil. Use well rotted manure or phosphate fertilizer. Cultivate and water regularly. Sow seeds six weeks before intended transplanting; water immediately after. Set tall varieties 18 in. apart, medium sorts 12 in. apart, dwarf types 9 in. apart.

EARLY AMERICAN BEAUTY

Non-branching, 2½ ft. to 3 ft., mid-Sept. Popular garden and florists' cutflower variety; 3 in. to 4 in. flowers have firm, broad, incurved petals with slight whirl at center.

Vetterle & Reinelt Pacific Hybrids

Delphinium Seeds

VETTERLE & REINELT'S (PACIFIC HYBRIDS) were awarded a gold medal at the 1939 and 1940 Oakland Spring Garden Shows, the annual flower events of the Pacific Coast. Could not compete in 1941.

V. & R. Delphiniums are classed with the top-ranking strains of the world. Praises of them are just as numerous and sincere from the professionals as from the amateurs.

HAND CROSS-POLLINATED seed is V. & R.'s best strain. This stock possesses the most desirable characteristics, qualities which are intensified to the greatest degree possible. The percentage of **show specimens** from this hand **cross pollinated** seed is the highest obtainable.

SELF-POLLINATED seed is collected from outstanding plants and will produce plants fairly uniform in color and type. For exhibition plants, however, sow the hand **cross pollinated** seed.

Blue Bird Series (new 1941). At last a true blue Delphinium; clearest medium blue with white bee. Besides coming true to color they carry well rounded 2½ in. flowers; long graceful spikes. A new standard in blues of today.

BLACK KNIGHT (new '39). The darkest of them all; the heavy, velvety texture lends a tone vividness and luminosity never seen before; 2½ in. florets; long, well formed spike.

BLUEJAY. Strikingly clear true blue, medium to dark, intense and alive with dark contrasting bee.

CAMELIARD SERIES (new 1940). Pure lavender self with white bee. Perfectly formed flowers; well balanced spike.

GALAHAD SERIES (new 1939). A giant race—3 in. individual white flowers of heavy, glistening texture, well spaced on strong, thin cylindrical spikes; fairly mildew resistant.

King Arthur Series. Rich royal purple with a velvety texture and large white bee. One of the most brilliant.

CROSS-POLLINATED SEED—each: Pkt. \$2.50, Collection 5 vars. \$10.00.
½ pkt. \$1.25, Collection 5 vars. \$5.00.

SELF-POLLINATED SEED—each: Pkt. \$1.00, Collection 5 colors \$4.00.

PARADISE (New '41) Illustrated)

Here is an asparagus that actually comes into bearing **ONE YEAR EARLIER** than any other variety. An exceptionally strong, vigorous producer. Some say it produces twice the crop of ordinary asparagus. The stalks are like Martha Washington in appearance, large and green. Just imagine, only 6 to 8 stalks needed to make a pound. Its flavor is unusually mild and liked by all. Paradise is rust-resistant. Seed sown in Spring will bear asparagus for picking 2 years later. One year old Paradise roots, set out this Spring, will produce next year, asparagus as large and stalky as ordinary two- and three-year-old roots.

Roots: 1 yr. old—100, \$5.50.

Fifty Day Sprouting Broccoli

Easier to grow than Cauliflower.

No other table green has captured the appetites of a Nation more than Broccoli, and why not? Its delicious fine flavor is appetizingly pleasing even to children, yet rich in iron; more easily digested and is of easier culture. Set plants 18 in. apart in rows and 24 in. between; when the center flowers form, cut with about 7 in. of stem; this will be followed later by several smaller heads. No fuss in tying up, like in cauliflower.

Fifty Day Sprouting Calabrese

Just think of it—you can pick "Fifty Day Sprouting Broccoli" in 40 to 50 days after transplanting, in certain localities; 50 to 60 in others. It is unquestionably the earliest in cultivation, yet may be used for late sowing (up to July). The heads are large, deep green, the texture extra fine and tender, the taste superb. It is a sprouting type, producing many lateral heads after the center head is cut; being a great heat resister, it will not burst into flower. Seeds of this superlative variety were imported direct from the grower in Italy.

LAWN GRASS SEED

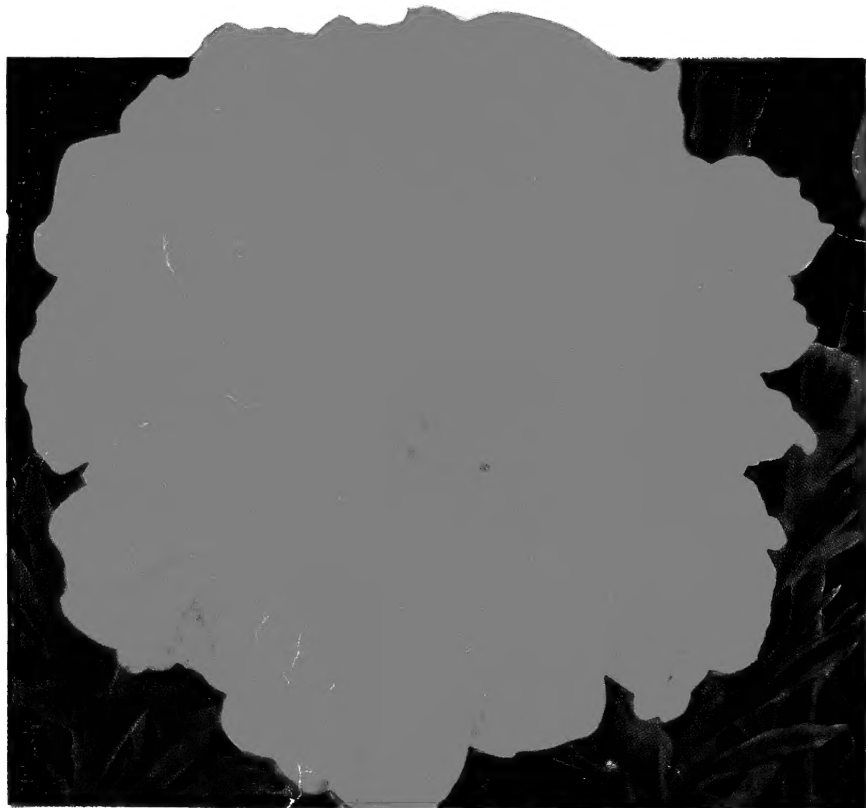

What makes this peaceful landscape so beautifully balanced? What makes it so restful to the eye?—to the mind? That soothing mass of green color. The green of the leaves. The green of the lawn. For it is said that green, the color of sophistication, leads to restraint. It is grave, dignified. It arouses in us an emotion of tranquility. You, too, can lend a touch of placidness to your own home-grounds by seeing that your lawn is well made. See that it is seeded with vigorous grass seeds, the proper sorts to produce that deep velvety green lawn. May we suggest BURNETT-SEEDSMEN'S FORMULA NO. 1, the NUMBER ONE Lawn Grass Seed Mixture, because it contains 25% Chewings Fescue, 25% Kentucky Blue, 25% Red Top and 25% Rye Grass.

FORMULA No. 1 sells for: Lb. 80c; 5 lbs. \$3.75; 10 lbs. \$7.25; 25 lbs. \$17.50; 100 lbs. \$67.00, prepaid
